

Co-Curricular activities Report 2021-2022

“There are two Educations. One should teach us how to make a living and the other how to live.”

The part of Education that teaches us how to live is co-curricular activity. Education without co-curricular activities is like educating the mind without educating the soul. Co-curricular activities are the activities, through which our students explore his / her abilities, eradicate their weaknesses and create a broader vision of life. The importance of co-curricular activities in modern education can be fathomed but the fact that these activities have become an integral part of the curriculum policy and present day school life cannot be imagined without ongoing debates, recitations, music competition, dance, drama to name a few from the ever increasing list. Our motive is encouraging our students to learn, contribute, manage and organize individually as well as in a team.

We at St. Mary’s School, Bathubasti are not far behind and the school year of 2021 was no different. The map of co-curriculum activities is dotted with the achievements of our students.
